

Computer Network Homework 3

B07902034 資工三 王昱凱

How to execute my code:

\$ make all

\$./receiver <agent IP> <agent port> <receiver port>

\$./agent <sender IP> <receiver IP> <sender port> <agent port>
<receiver port> <loss rate>

\$./sender <agent IP> <sender port> <agent IP> <file address>

Ex:

```
$ ./receiver local 8888 8889
```

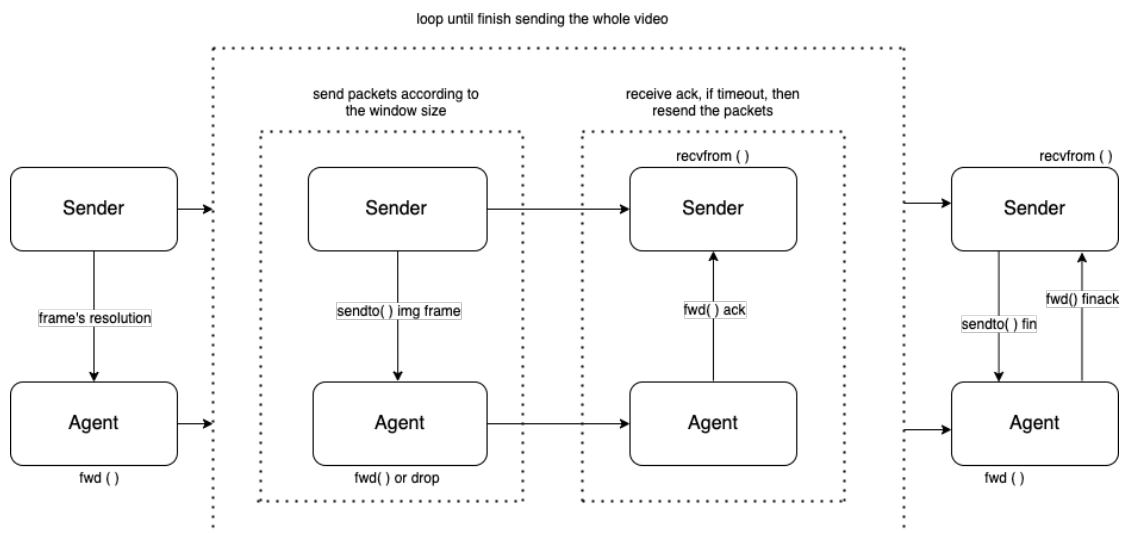

```
$ ./agent local local 8887 8888 8889 0.1
```

```
$ ./sender local 8887 8888 ./tmp.mpg
```

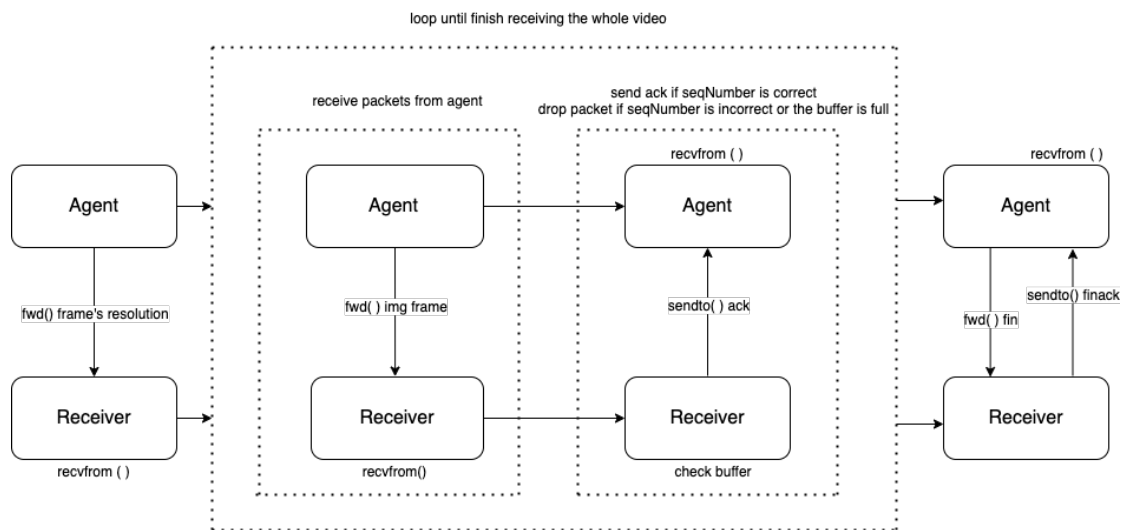

麻煩助教按照 receiver -> agent -> sender 這樣的順序去執行，謝謝

Explain my program structure:

Sender:

Receiver:

Agent:
